

Yu solar charger

AM115

Universal Solar Charger with powerful solar panel.

The Yu solar charger has been manufactured of pure silicone and sports a 2,000 mAh battery. It is suitable to charge various mobile devices on the go, like Smartphones, GPS and E-book readers.

This new, trendy outdoor solar charger has a powerful 1.5Watt high efficiency solar panel, so it easily recharges by using the sun. The internal battery stores the collected solar energy and hands it out when a USB device is connected.

The unique silicone case ensures the charger's protection, even in the harshest weather environments. The USB ports are covered with rubber pads so that the case is fully dust-, shock- and water resistant to IP65 standards. The Yu comes fully supplied with connectors and a carbine hook for easy carriage or attachment to your bike, backpack or tent.

The Yu solar charger is ideal for holidays, hiking, biking or other outdoor activities, especially due to its ruggedized nature.

Compatible with all Google Android™ and Apple® phones.

In short:

- Universal solar Charger
- Splash- & dust-proof silicone casing (IP65 Standard)
- Easily attachable because of included Carbine Hook
